SUMMARY

Full-stack software engineer specializing in secure, cloud-native SaaS applications and AI-enhanced solutions. Expertise in React, Angular, Node.js, AWS, and Python for backend automation and API integration. Holds an M.S. in AI Engineering, with a proven track record in delivering scalable, user-focused features using Agile methodologies and modern CI/CD practices.

EDUCATION

University of Pennsylvania

Master of Science, Engineering in AI

University of Washington

Bachelor of Science, Informatics(Computer & Information Science)

WORK EXPERIENCE

Wilbur Ellis

Jun 2024 - Sep 2025

Software Engineer II & Scrum Master

Remote, WA

- Built and shipped end-to-end features for a large-scale agricultural data-collection and agronomist recommendation app using Angular, Ionic, TypeScript, and NgRx, ensuring seamless operation in low-connectivity environments through robust state management and offline data-sync strategies.
- Designed and developed new microservice repositories and RESTful API endpoints using Node.js/Express, which reduced network latency and improved data flow between services and client applications, aligning with modern API development and data integration practices.
- Led technical design spikes for two PO initiatives—re-login mechanism and minimum-version enforcement—to strengthen application security, ensure backward compatibility, and prevent unauthorized client access.
- Planned and facilitated sprint planning, daily stand-ups, and retrospectives, driving improvements in estimation accuracy by 15%, reducing cycle time by 20%, and boosting team morale by refining workflow and backlog practices.

ASD Infinity Solutions

Jan 2024 - Jun 2024

Full Stack Software Engineer

Remote, BC

- Engineered AWS Lambda functions to establish a custom, passwordless authentication system for a healthcare application, enhancing security and reducing login issues by 40%.
- Developed and integrated RESTful APIs alongside interactive frontend components using React and Node.js within a Vercel Next.js environment, optimizing healthcare data retrieval performance by 30% and aligning with modern web development practices.
- Collaborated closely with product managers and designers to translate client requirements into functional, user-centered application features, ensuring technical excellence and responsive design.

Amazon Web Services

Jun 2022 - Sep 2022

Software Engineer Intern

Seattle, WA

- Implemented innovative UI enhancements for authenticator examples on Amplify UI using React, Next.js, and TypeScript, resulting in a 20% increase in user engagement.
- Collaborated with senior engineers and product managers to refine the user experience on the documentation website, reducing bounce rate by 20% and increasing engagement by 15%.
- Authored and updated comprehensive technical documentation for software projects, including detailed code comments and user guides, which led to a 30% reduction in troubleshooting time for future development teams.
- Facilitated multiple design review meetings to ensure effective cross-functional collaboration, receiving positive feedback on proposed solutions.
- Delivered a proof of concept (POC) for mocking authenticator XState machine functions within 2 weeks, setting the stage for implementation to benefit over 140K weekly Amplify UI users.

PAST PROJECTS

Adios COVID, Backend Engineer

University of Washington

- Collaborated with cross-functional teams to design and implement a database schema, resulting in a 50% reduction in data retrieval time.
- Developed REST APIs using AWS Lambda functions in Python, leading to a 75% increase in overall system performance.
- Efficiently populated the database using AWS S3 buckets, resulting in a 30% decrease in data loading time.

Spotify Time Capsule, Fullstack Engineer

University of Washington

- Led ideation and development of a full-stack web application utilizing Spotify Developer API endpoints, resulting in the creation of "Spotify Time Capsule," a user-friendly tool that allowed users to create personalized playlists from a chosen time frame. Incorporated genre filtering feature, increasing user engagement by 40%.
- Collaborated with cross-functional teams to deliver an efficient, responsive, and scalable product. Utilized front-end and back-end development skills to ensure seamless integration and improve the overall performance of the application.
- Performed comprehensive testing on the web application, resulting in a 95% bug-free release. Conducted a rigorous QA process and resolved all issues promptly, ensuring optimal user experience.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, SQL
- **Frontend:** Angular, React, Next.js, Ionic, NgRx, HTML/CSS, Jest, Capacitor
- **Backend:** Node.js, Express, REST APIs, Microservices, Couchbase
- **Cloud & DevOps:** AWS (Lambda, S3), Vercel, CI/CD
- **Tools:** Git/GitHub, Github Copilot, VS Code, Postman, Jira, Atlassian Suite, Slack, Figma, XCloud, Testflight, AI Dev Tools, Elementor
